

Statement from Drumshanbo VS

We have been informed that four of our students – all in the same senior year have tested positive for COVID-19. As a precaution we have returned to on-line classes for all Fifth & Sixth Years until we get further advice from the HSE. We have implemented our Covid response plan which includes disinfection of all areas of the school.

We are in consultation with the HSE and will follow HSE protocols and the public health guidelines. We also consult with the MSLETB Covid Response Team. All necessary precautions have been taken to prevent any exposure in school to staff or students. The HSE is responsible for testing and contact tracing and we are co-operating with them to ensure all information is provided and they can evaluate any further steps that may need to be taken.

Our primary focus, at this time, is to support the work of the HSE and to support the recovery of those affected while continuing to prioritise the safety, health and wellbeing of students, staff and teachers.

Parents will be advised of any further updates by text.
